CIT 140 · Week 7 · Data-Quality Report

Meridian Forge · fictional inspection export v1

Learner name / date	Stephania Malagon 11/8/26
Import status	20 rows loaded

Amber cells: your responses. Other results calculate from Prepared and Audit.

Rule	Check	Rows flagged	Share of all rows	**Affected Row_IDs**
Q01	Machine ID is required	2	10%	R03, R14
Q02	Work order is unique	2	10%	R05, R06
Q03	Status uses the agreed list	2	10%	R08, R16
Q04	Duration is in range	3	15%	R10, R18, R20
Q05	READY identifies an inspector	3	15%	R03, R07, R12
Distinct rows with any issue		11	55%	Count each row once, even when several Q-rules flag it. Do not add the five counts.

Scope: all 20 supplied records. Q02 flags every row in a repeated Work_Order_ID group; extra duplicate copies are a different measure. Unresolved fields remain flagged, not guessed.

Source: authored CIT140 case W07-S01 (Raw) and W07-S02 (rules). Report a data-quality finding, not a machine safety clearance. Explain your evidence and next action on page 2.

Week 7 · Explanation and refresh evidence

Finding: Row_ID, Q-number, actual value, source and effect

R03 fails in both Q01 and Q05.

Next action: what to verify, who owns it, and how to retest

Figure out what or where R03 was originally supposed to do and work.

Limit: why you cannot guess a correction or prove accuracy

Machine ID and inspector seem to be missing.

Professional connection: one framework idea and how you used it

R03 happens to miss both human/person roles.

Refresh test: before, changed value, after, and restored result

Filtering chnges the outcome.

Export only Report: two landscape pages, page break before row 26. Review both pages.
