Validated Requirements Set

Unfinished_Clinic_Visitor_Report.pdf · Revision 2054

R-01 · functional

Requirement: The scheduler/receptionist must be able to select which department the user is submitting and handling the appointments for.

Source: W04-S01 · Dana Ruiz

Rationale: The client/visitor is left in a state of pause as their appointment isn't fully completed on either end. In addition, staff is also limited in their abilities due to their department/area of expertise.

Acceptance check: When a Scheduling or Intake use the word "Held", the system will not allow the appointment to be processed till they have confirmed which department/context the word is used in.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: .

R-02 · functional

Requirement: The system must show the meaning of "held" for both contexts/departments when used.

Source: W04-S01 · Dana Ruiz

Rationale: This matters because both departments, Intake and Scheduling, have different meanings for the word "Hold" which causes delays for both staff and visitors.

Acceptance check: When the system detects the use of "held", it will prompt the user/staff to choose which meaning they intend.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: .

R-03 · functional

Requirement: The system can only allow a same-day slot to be offered if a room and qualified technician are available.

Source: W04-S02 · Dr. Lena Okafor

Rationale: This matters because an open schedule does not indicate the level of readiness a clinic may have, or whether they have the qualified people on hand.

Acceptance check: Staff can test out the scheduling process through an isolated environment from the perspective of visitors.

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: .

R-04 · functional

Requirement: The system has to immediately alert staff to a new appointment.

Source: W04-S02 · Dr. Lena Okafor

Rationale: This matters because both the clinic and the visitors can indicate when they are ready.

Acceptance check: Staff can verify that they receive notification/alerts to the new same-day appointment.

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor
